AI SCAN

Is your business ready for AI?

Five questions, about one minute. Tick yes or no for each one, then read your result below.

01 **Can you name the three processes where your team loses the most time?** ☐ Yes ☐ No
These are usually where AI pays back first.

02 **Do you know which of those repeat every day or week?** ☐ Yes ☐ No
Repetitive, rules-based work is the strongest fit for AI.

03 **Have you asked the people who do that work, not just their managers?** ☐ Yes ☐ No
Managers know the process as designed. Their teams know it as it runs.

04 **Could you say which AI ideas you would not fund?** ☐ Yes ☐ No
Knowing what to skip protects the budget as much as knowing where to start.

05 **Is one person responsible for deciding what to try first?** ☐ Yes ☐ No
Without an owner, good ideas stall between meetings.

Your result

All five yes	You are ready to pick a first AI project.
One no	Close that gap first, then pick a project.
Two or more no	Start with an assessment before buying tools or funding a build.

Your three biggest time sinks

Write them down. This list is the starting point for any AI decision, whether you run an assessment or not.

Task	Who does it	Hours a week	How often
